To: Tim Brown <tim.brown@solvay.com>, Ouisa Toenyes <ouisha.toenyes@solvay.com>

Tim, I will be getting the actual report to you in the next few hours. But in the meantime, here is a skeleton cover letter for you to put on Solvay letterhead - to accompany the report.

Rodger

Re: Natural Gas Boiler Addition

Dear Mr. Law,

Solvay submits the attached BACT analysis of greenhouse gas emissions for its proposed installation of a 254 MMBtu/hour natural gas fueled boiler. The boiler is to be installed at the existing Solvay facility which is located 20 miles west of Green River, Wyoming, in Sweetwater County. The criteria pollutant application is to be submitted separately to Wyoming Department of Environmental Quality (DEQ) in the next few months. While this component of the application is being submitted earlier than the criteria component, we understand your intent and Solvay encourages EPA and DEQ to combine the review and public comment of the full application.

Three copies of this report are attached, with a copy also being sent to DEQ. Please contact Tim Brown of Solvay (307-872-6570) or Rodger Steen of Air Sciences Inc. (303-807-8024) with any questions you might have on this analysis.

Sincerely,

Tim Brown
